

Wasp Trap

Insert strap into holes at either side of the yellow funnel.

NOTE : once inserted, the strap cannot be removed.

Place yellow funnel on to a flat surface. Pour wasp attractant into funnel reservoir. Do not dilute with water.

For ease of fixing, hold strap gently to one side and line up the bucket with the funnel (see asterisk on diagram). Push together ensuring a secure fit. Slip clear plastic strap between grooves on top of bucket.

Hang trap with string from loops on the strap.
